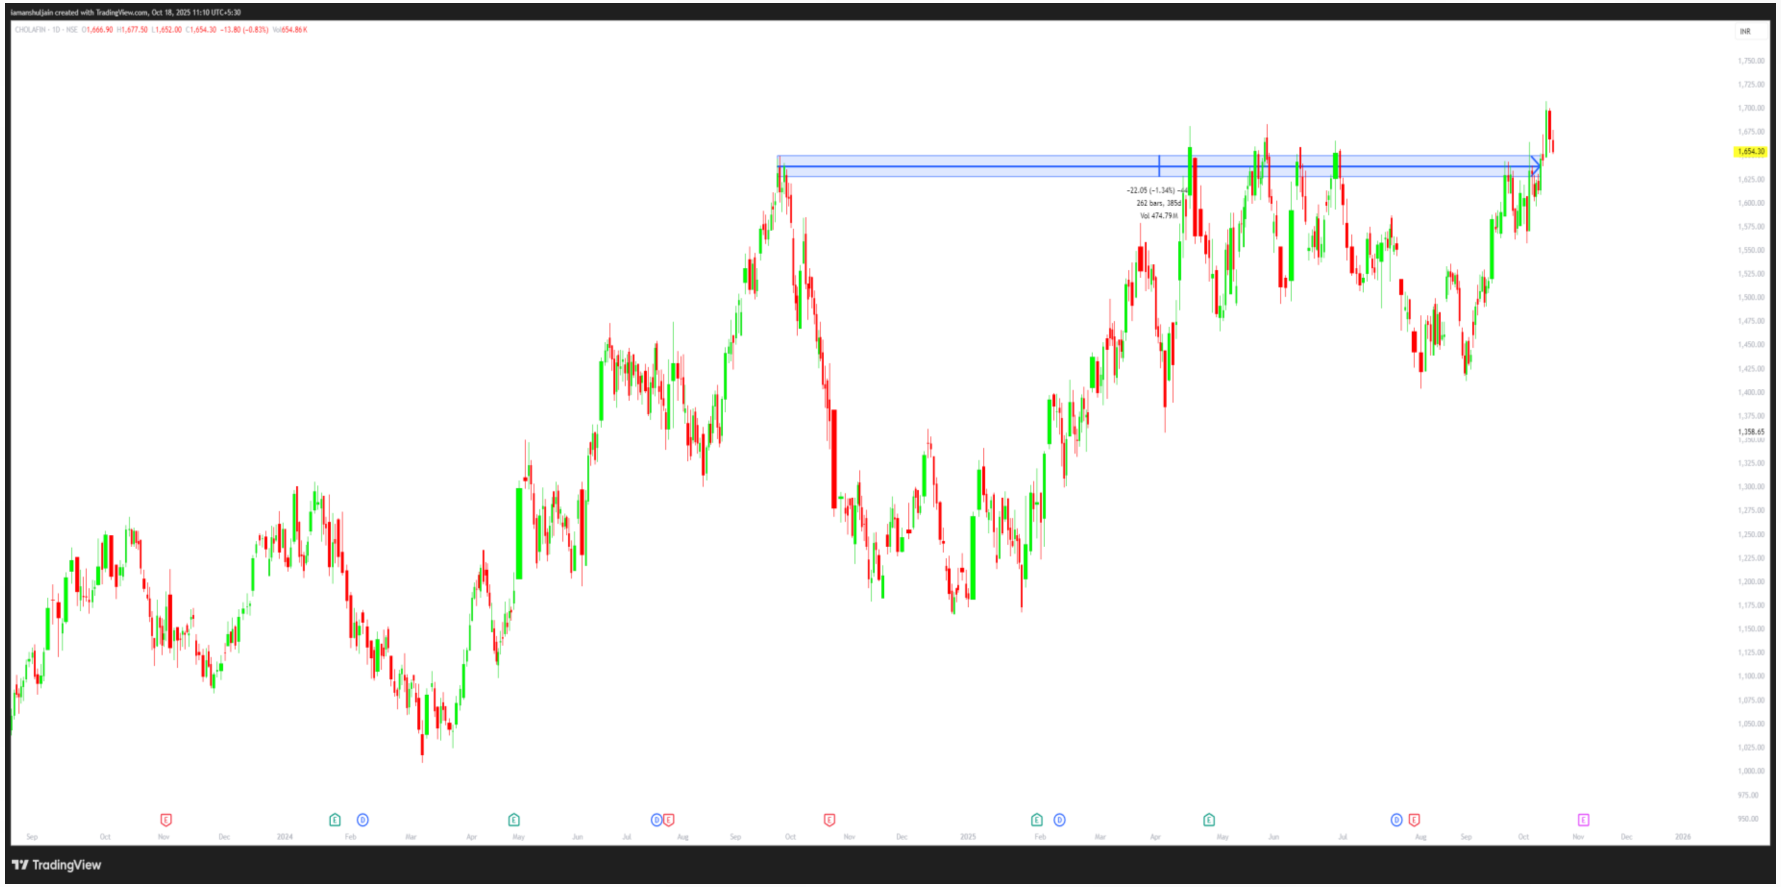
<u>“Shriram Finance: Setting up for a larger breakout”</u>

Shriram Finance has posted a **small cup-and-handle breakout** around **₹638**, setting the stage for a move toward the **larger VCP (volatility contraction pattern)** neckline in the **₹712–₹714** zone. Volumes are ideal to support the bullish structure, confirming active participation behind the move. Momentum indicators remain firm, and the **moving averages are aligned positively**, signaling scope for a sustained uptrend. If the stock maintains its current rhythm, a breakout above ₹714 could open the door for a significant upside extension. Shriram Finance looks well-positioned to lead the next leg within the financial space.

Strategy : Buy
Cmp 675
Stop loss : 640
Target 714



“Cholamandalam Finance: Bullish momentum builds post major breakout”

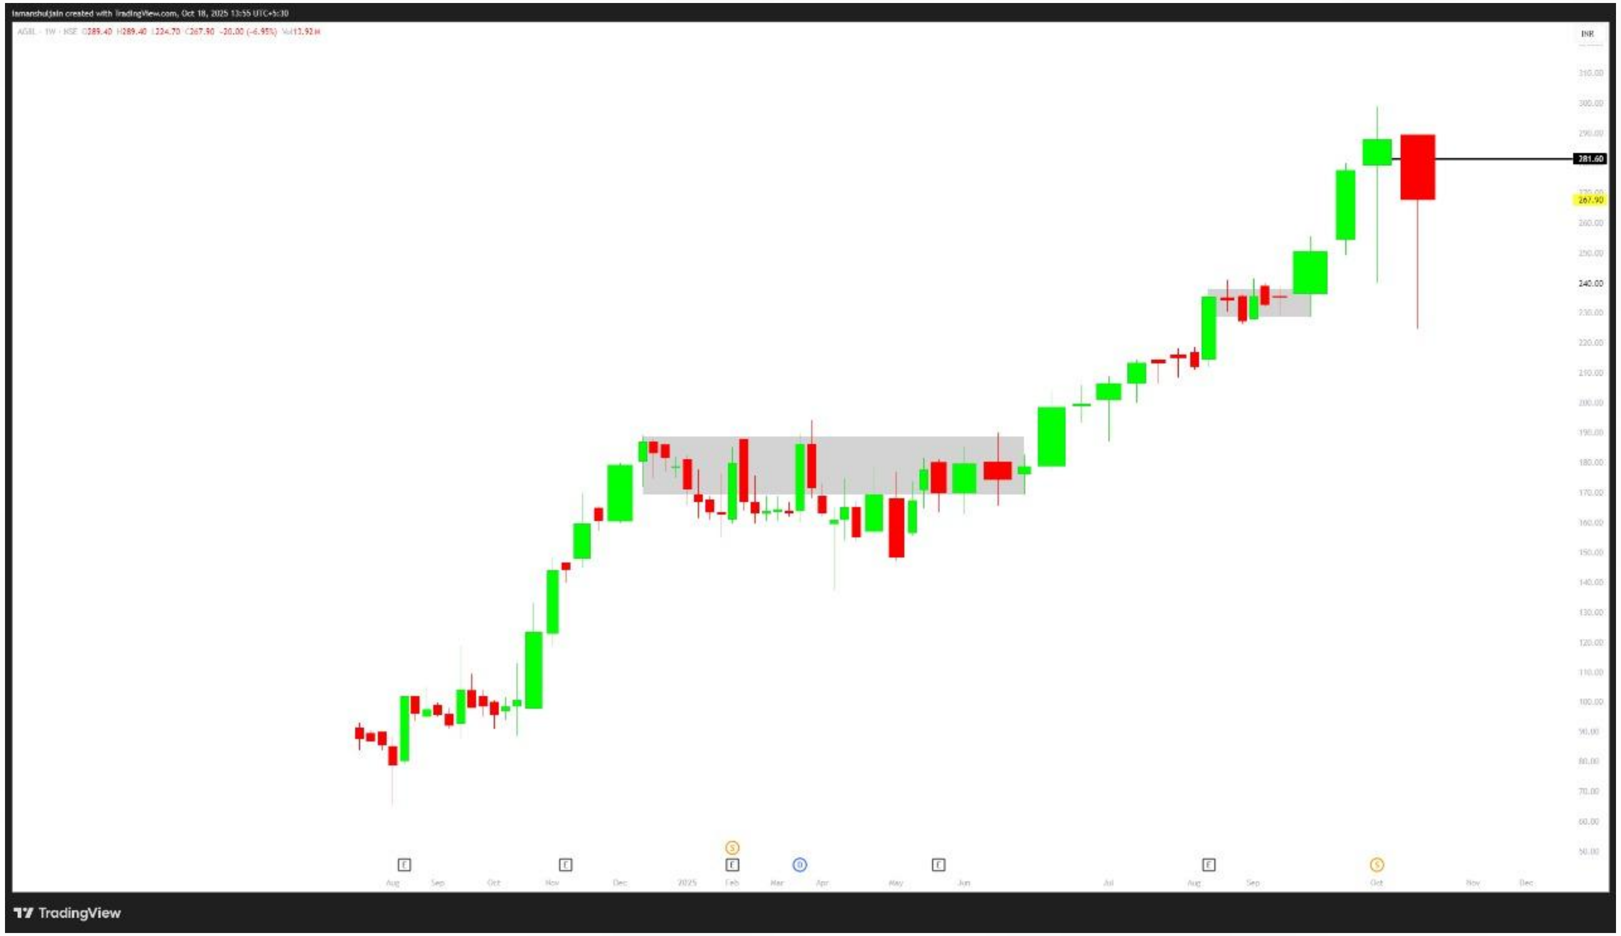
Cholamandalam Finance has broken out of a **262-day-long VCP (volatility contraction pattern)**, signaling a strong bullish structure. In the past two sessions, the stock has **retested its breakout zone around ₹1,650**, confirming support. Any further dip toward the **₹1,650–₹1,620** range should be seen as an **opportunity to add longs**, with an immediate upside target of **₹1,850**, the smaller projection of the pattern. **Momentum indicators and moving averages are aligned positively**, acting as a propeller for the ongoing uptrend. The setup suggests the stock could maintain leadership among NBFC peers in the near term.

Strategy : Buy
Cmp 1654
Stoploss 1600
Target 1850

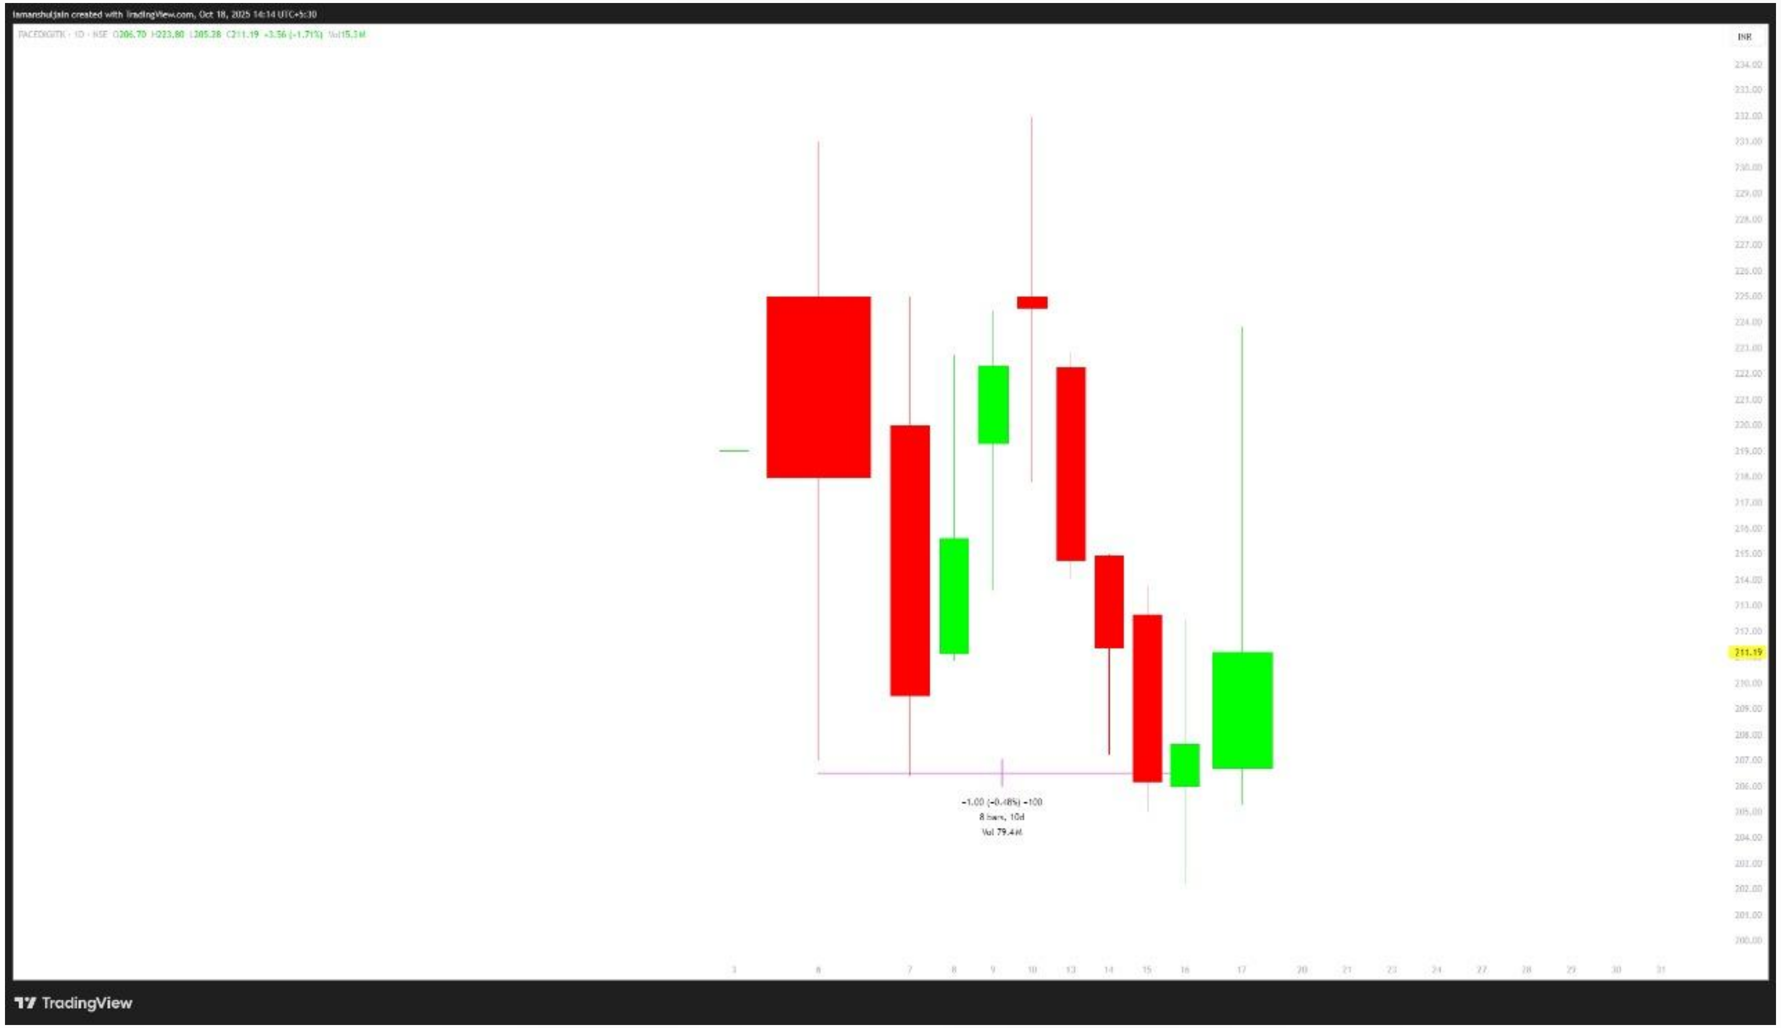
“Adani Ports: Eyeing a major breakout toward new highs”

Adani Ports is on the verge of a **bullish breakout** from a **261-day cup-and-handle pattern**, with the breakout zone placed around **₹1,485–₹1,490**, rounding off to the key **₹1,500** level. A **high-volume move above ₹1,500** could push the stock to **fresh all-time highs**, with a **pattern target near ₹2,000**. The price setup is supported by firm momentum and accumulation signals, suggesting strong institutional interest. On the downside, **major support sits near ₹1,400**, which swing traders are likely to use as a stop level for both existing and post-breakout long positions.

Strategy : Buy
CMP : 1479
Stoploss 1400
Target 1606/2000



AGI Infra has successfully retested its second base around ₹230 and staged a sharp, aggressive rebound post-retest, indicating that weak hands have exited while stronger participants have entered the stock. The swift recovery reflects renewed strength and conviction in the broader uptrend. Structurally, the setup remains highly positive, with the stock showing clear relative strength against broader indices. With an annual perspective, AGI Infra appears well-positioned for a sustained breakout into new all-time highs, which could trigger fresh and aggressive momentum driven by strong institutional participation.Strategy : Buy CMP 267SL 210 Target 400



Pace Digitalk has swept its IPO low with strong volumes, indicating that weak longs have been shaken out and strong hands are now accumulating the stock. The sharp recovery on Friday, following Thursday’s sweep, further confirms institutional accumulation and renewed buying interest. This price action reflects a shift in control from retail to stronger investors, a healthy sign for a sustainable upmove. With improving momentum and constructive volume behavior, the stock appears poised for a continuation of its recovery trend, and we believe it can head towards ₹300 levels initially, provided it sustains above the recent support zone.Strategy : BuyCmp 211StopLoss : 170Target 300

Lakshmishree Investment and Securities Limited, a SEBI-registered Research Analyst with Registration No. INH000014935, is engaged in providing stockbroking, investment advisory, and research analysis services.
