Additionally, we may not have in place the necessary systems and processes to develop key personnel internally. The loss of key members of our senior management or other key team members, particularly to competitors, could have an adverse effect on our business and results of operations. Our performance also depends on our ability to attract and train highly skilled personnel. Most of these approvals are granted for a limited duration. While we are required to obtain several approvals for legally conducting our business operations and we submit the applications for renewal of such approvals, as and when required, during the course of our business operations, we cannot assure you that we will be able to obtain approvals in respect of such applications, or any application made by us in the future. For details related to Government Approval applied but approval pending, please refer to chapter titled as “Government and Other Approvals” on page no. 147 of this Prospectus. Failure on our part to renew or maintain such permits, licenses or approvals may result in the interruption of our operations and may have a material impact on our business. In the future, we may also be required to obtain new permits and approvals for our proposed operations. While we believe that we will be able to obtain such permits and approvals as and when required, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure by us to maintain or obtain the required permits or approvals, may result in the interruption of our operations or delay or prevent our expansion plans and may have a material and adverse effect on our business, financial condition and results of operations.

27. Compliance with and changes in safety, health and environmental laws and various labour, workplace and related laws and regulations impose additional costs and may increase our compliance costs and a such adversely affect our results of operations and our financial condition.

We are subject to a broad range of safety, health and environmental laws and various labour, workplace and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of raw materials, noise emissions, air and water discharges, on the storage, handling, employee exposure to hazardous substances and other aspects of our operations. To remain competitive and efficient, modernization and technology up gradation are crucial for reducing costs and increasing output. Our business heavily relies on technology and machinery to deliver quality products. However, there is a risk of our technology and machinery becoming obsolete over time or not being upgraded timely, which can adversely impact our operations and financial condition. While we believe that we have implemented updated technology, we understand the importance of continuous improvement. We are committed to staying abreast of the latest technological standards and trends to enhance our capabilities. In the event of a new technology emerging in our industry, we may be required to invest in adopting that technology or upgrading our existing machinery and equipment to remain competitive.

The costs associated with upgrading technology and modernizing machinery are significant, and they can have a substantial impact on our finances and operations. These investments may lead to higher capital expenditures and can temporarily affect our profitability and cash flow. We must carefully assess the potential benefits and returns on such investments to ensure they align with our long-term growth objectives.

Our ability to successfully implement technology upgrades and modernization efforts depends on various factors,

including availability of skilled technicians, compatibility of new technology with existing systems, and adequate financial resources. Delays or challenges in adopting new technology can hinder our operational efficiency and competitiveness in the market.

30. Fraud, theft, employee negligence or similar incidents may adversely affect the results of operations and financial condition.

Our Company faces potential risks related to incidents of theft or damage to inventory. These incidents could have a negative impact on the results of operations and financial condition. Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

33. Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.

We propose to utilize the Net Proceeds towards utilization for the Working Capital Requirement and General Corporate Purposes. For further details of the proposed objects of the Issue, see Chapter titled as "Objects of the Issue" beginning on page no. 66 of this Prospectus. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such

approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

34. Any future issuance of our Equity Shares may dilute prospective investors' shareholding, and sales of our Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financing could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders.

We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy. Any issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

35. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "Basis for Issue Price" beginning on page no. 73 of the Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

36. The Objects of the Issue for which funds are being raised, are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titled as "Objects of the Issue".

The fund requirement and deployment, as mentioned in the chapter titled as "Objects of the Issue" on page no. 66 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter titled "Objects of the Issue" on page no. 66 of this Prospectus is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation under chapter titled "Objects of the Issue" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control and will be subject applicable rules and regulations. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected

revenues and earnings.

37. In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled “Objects of The Issue” on page no. 66 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

38. We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the Company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of please refer chapter titled “Object for the Issue” beginning on page no. 66 of this Prospectus.

39. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. The failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

40. Certain data mentioned in this Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

The price of the Equity Shares on the stock exchange may fluctuate as a result of the factors, including:

- Volatility in the India and global capital market;
- Company’s results of operations and financial performance;
- Performance of Company’s competitors;
- Adverse media reports on Company;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India’s economic and fiscal policies; and

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There can be no assurance that an active trading market for the Equity Shares will

develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

1. An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

2. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

3. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 102 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

4. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

5. More than 100% of Revenue of our Company is derived from business in India and a decrease in economic growth in India could cause our business to suffer.

At present, we our more than 100% of the revenue is derive in India, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

6. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

7. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company has appointed Swastika Investmart Limited as Lead Manager for the equity shares of our Company. However, the trading price of our

Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

8. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index - based market - wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

9. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include various taxes introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates / slab will continue in the future. Any changes in these tax rates / slabs could adversely affect our financial condition and results of operations.

10. BSE may not grant Approval for listing of equity shares of our Company.

Our company will apply for In-principle approval to BSE for its proposed public issue. There is a risk that the BSE Limited (BSE) may not grant approval for our proposed public issue. The approval process involves rigorous scrutiny of our company's financials, compliance with regulatory requirements, and overall suitability for listing. Despite our best efforts to meet all regulatory standards and provide comprehensive disclosures, there is no guarantee that the BSE will find our application satisfactory. Non-approval by the BSE would significantly impact our ability to access the capital markets and raise the necessary funds for our planned expansions and operations. This could adversely affect our financial condition and future growth prospects. Investors should consider this risk before making any investment decisions.

11. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the SME Platform of BSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

12. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

13. The Equity Shares have never been publicly traded, and the Issue may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price.

Prior to the issue, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the

Equity Shares will develop, or if developed, there will be liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue can be volatile as a result of several factors beyond our control, including volatility in the Indian and global securities markets, our results of operations, the performance of our competitors, developments in the Indian and global machine tools industry, changing perceptions in the market about investments in this sector in India, investor perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalisation and deregulation policies, and significant developments in India's fiscal regulations. In addition, the Stock Exchanges may experience significant price and volume fluctuations, which may have a material adverse effect on the market price of the Equity Shares. General or industry-specific market conditions or stock performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of the Equity Shares. In particular, the stock market as a whole in the past has experienced extreme price and volume fluctuations that have affected the market price of many companies in ways that may have been unrelated to the companies' operating performances. For these reasons, investors should not rely on recent trends to predict future share prices, results of operations or cash flow and financial condition.

14. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

15. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

16. Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighboring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

World Economic Outlook: Global growth appears to be decelerating, with several key advanced economies slowing in the third quarter. Gross domestic product (GDP) contracted in Japan (-2.1% annualised) and the eurozone (-0.2%). Meanwhile, GDP growth slowed in the United Kingdom (UK; 0% vs 0.2% previous quarter). Improvement	Decline	Unchanged
-------------	---------	-----------

US growth accelerates

Real GDP in the US expanded an annualized 4.9% in the third quarter (vs 2.1% previous quarter), the fastest since the fourth quarter of 2021. Higher consumer spending (4% vs 0.8%) drove the growth, supported by exports, government spending, private inventory investment, and residential fixed investment.

The US economy added 150,000 jobs in October (vs an average of 258,000 in the previous 12 months). The unemployment rate edged up to 3.9% (vs 3.8% the previous month), its highest since January 2022.

Inflation eased to 3.2% in October (vs 3.7% the previous month), led by a 4.5% on-year slide in energy prices (vs 0.5% decline). Core inflation moderated marginally to a two-year low of 4% (vs 4.1%).

The Federal Reserve maintained the funds rate at 5.25-5.5% for the second consecutive time at its November meeting. The committee noted it will factor in tightening of monetary policy, the lags with which it affects the economy and further developments for additional policy firming.

The trade deficit widened \$2.9 billion on-month to \$61.5 billion in September, as the rise in imports outpaced the increase in exports.

UK trade deficit narrows

Real GDP growth was flat in the UK in the third quarter (vs 0.2% previous quarter). Output in the services sector contracted 0.1%, which was largely offset by 0.1% growth in output in the construction sector. Manufacturing output remained steady. Inflation fell sharply to 4.6% in October (vs 6.7% previous month), the lowest rate since October 2021, led by the housing and household services category (-3.5% vs 6.9%). The Bank of England held rates steady at 5.25% for the second consecutive time at its November meeting. The committee raised its inflation forecast, as it believes that risks are tilted to the upside. It also cut its GDP forecasts, citing weaker- than-expected activity data. The UK's trade deficit narrowed to £1.57 billion in September (vs £2.7 billion previous month), as the fall in imports (-3.7%) outpaced the decline in exports (-2.2%).

Eurozone inflation declines sharply

The eurozone economy contracted a seasonally adjusted 0.1% in the third quarter (vs expansion of 0.2% the previous quarter). Inflation declined sharply to 2.9% in October (vs 4.3% the previous month), the lowest rate since 2021. Energy prices fell at a sharper pace (-11.1% vs -4.6%), while food inflation eased (7.5% vs 8.8%). Core inflation, which excludes energy, food, alcohol and tobacco, softened to 4.2% (vs 4.5%). The European Central Bank held interest rates steady in October, following 10 consecutive rate hikes since July 2022. The central bank believes maintaining rates at current levels for a sufficient duration will significantly contribute to achieving its target inflation.

Bank of Japan loosens yield curve control

Japan's GDP contracted 2.1% in the third quarter (vs 4.5% growth the previous quarter) following two straight quarters of growth. The au Jibun Bank Japan Manufacturing PMI (Purchasing Managers' Index) increased to 48.7 (vs 48.5). It remained below the neutral level of 50 for the fifth consecutive month, indicating contracting manufacturing activity. Inflation eased to 3% in September (vs 3.2%), led by a greater fall in prices of fuel, light and water (-14.3% vs -12.3%). However, food inflation accelerated to 9% (vs 8.6%), the highest rate since 1976. The Bank of Japan adjusted its yield curve control policy, allowing the yield on the 10-year Japanese government bond to rise above 1%. It kept the policy rate unchanged at 0.1%. Japan's trade deficit narrowed sharply to JPY 662.6 billion in October (vs JPY 2205.9 billion in the same month last year), as imports contracted sharply (-12.5%) while exports rose (+1.6%).

Manufacturing activity contracts in China

The official National Bureau of Statistics Manufacturing PMI decreased to 49.5 in October (vs 50.2 previous month). It has been below the threshold level of 50 for six of the last seven months, reflecting weakness in the manufacturing sector. The non-manufacturing PMI also fell in October but remained above 50, indicating expansion in the services sector.

Inflation in China turned negative to -0.2% in October (vs 0% the previous month). Food inflation declined to -4% (vs 3.2%), led by pork prices. Core inflation, which excludes food and energy, also slowed to 0.6% (vs 0.8%). Despite low inflation, the People's Bank of China held the key policy rate steady at 3.45% in November. However, the central bank ramped up liquidity injection in the banking system.

China's trade surplus fell to \$56.5 billion in October (vs \$82.4 billion in the same month last year), as exports declined (-6.4%) while imports rose (+3%).

Energy prices decline

Energy prices declined 1.8% month in October. Brent crude fell 3.1% on-month to average \$91.1/barrel (bbl) in October (vs \$94/bbl the previous month). Crude oil prices were volatile in October as conflict in the Middle East led to fears of supply disruption. Prices eased as Saudi Arabia pledged to help stabilize the oil market. Prices of Australian coal fell 12.5% on-month to \$142.1/metric tonne. Prices of European natural gas rose 26.2% on-month but fell 62.7% on-year. Non-energy prices fell a softer 1.6% on-month.

Indian Economy Outlook: The effects of the slowdown in global economic growth resulting from high inflation and the continuing war between Russia and Ukraine are also seen to be affecting India’s economic performance. The country recorded muted growth of 4.4% in Q4 2022 compared to 6.3% in Q3 2022, with sluggish private consumption and exports being the major reasons behind that. The country’s real GDP growth in the fiscal year 2022-23 is estimated at 7.0% in comparison to 9.1% in the prior year. However, some demand indicators such as record sales of 3.8 million in the passenger vehicles segment in 20221, strong growth in tractor sales, and a rise in domestic air travel, continue to support economic growth.

India’s quarterly GDP growth

Despite the sluggish growth in the latest quarter, we still expect India to be one of the major beacons of growth in 2023, driven by strong domestic demand and government expenditure. The efforts of the Union Budget 2023-24 to improve the disposable income of taxpayers in the country are expected to boost consumption via an increase in discretionary spending. In addition, the strong capital expenditure push provided by the Union Budget, with an increased outlay of 37.4% in comparison to the fiscal year 2022-23, is expected to drive growth, investments, and job creation. The government’s reduction of over 39,000 compliances and decriminalization of over 3,400 legal provisions will also foster the ease of doing business in the country.² Strong credit growth and resilience in financial markets are further expected to create an environment that supports investments.

A high unemployment rate, however, remains a concern for India, standing at 7.5% in February 2023. Inflation, which was falling since October 2022, spiked again to 6.5% in January 2023 driven by high food prices, breaking the Reserve Bank of India’s (RBI) upper tolerance limit, though still below the elevated levels seen during the first half of 2022-23. The RBI is focused on the withdrawal of accommodation aimed at controlling inflation, with policy repo rates hiked six times since May 2022. The ongoing global geopolitical tensions and higher demand from various countries lifting Covid-19-related mobility restrictions are also expected to affect commodity prices. Core inflation is expected to be affected by the continued transfer of input costs to output prices, particularly in the services sector. However, input costs and output prices are expected to ease in the manufacturing sector. Taken together, the RBI projects inflation at 6.5% for 2022-23 and 5.3% for 2023-24. A robust domestic demand and favorable government initiatives are expected to help India remain as one of the fastest-growing major economies globally. However, external challenges, such as a slowdown in the global economy and monetary tightening in advanced economies, are factors that could affect the country’s growth.

Global Rope Market Insights

Rope Market size was valued at USD 1.65 billion in 2021 and is poised to grow from USD 1.79 billion in 2022 to USD 3.22 billion by 2030, at a CAGR of 8.7% during the forecast period (2023-2030). The industrial sector, where the rope has a wide range of uses because of its versatility in handling big items due to improved material developments, is the main driver of global market growth. Another significant aspect that is anticipated to positively affect future market growth is the growing use of rope in high-rise infrastructure construction, particularly in developing nations. Due to the commercial use of polyolefin fibre, the rising displacement of hard fibre ropes with synthetic has moved quickly in industrialised countries. With the use of synthetic ropes, the industry will undergo a revolution of changes.

Traditional materials like steel wire and nylon are being replaced in the market. Also, the nautical sector benefits from the widespread use of synthetic ropes in industrial operations. It offers advantages including stronger, lighter, floatable, and less corrosive mooring, ship-assist, inland towing, and hoisting lines. For lifting and hosting in applications as well as for the transfer of mechanical power, steel wire rope is one of the many varieties that is frequently used. In the future, the Indian government's "Housing for everyone by 2022" programme will continue to be a major driver of these kinds of ropes. The National Association of Home Builders reports that there have been 8.4% more single-family building permits issued in the United States. As a result, it is anticipated that these expanding residential household expansions will increase the demand for various types of ropes and drive-up application costs.

US Rope Market is poised to grow at a sustainable CAGR for the next forecast year.

MANUFACTURING PROCESS OF OUR PRODUCTS

ROPES

Raw materials such as polypropylene and low density and high density polyethylene, etc. along with color pigments, are blended in a hopper/ mixer and fed into an extruder. Inside the extruder, the raw materials are melted at a temperature of 200-260 degrees and passed through a dye head. The newly formed material is then cooled in a cold water tank before proceeding to the first godet, where it undergoes a light stretching process.

Next, the material enters a hot blower oven for further heating and orientation. It then moves to the second godet, where it is stretched to a ratio of 1:10. The resulting yarn is wound onto rolls using a bobbin winder. The yarn is then moved to the twisting division, where coils of various sizes ranging from 2mm to 40mm are formed. These coils are further coiled in the coiling division to achieve the desired length. Finally, the product undergoes final packaging, where it is branded and prepared for distribution.

SWOT

STRENGTH	WEAKNESS
<ul style="list-style-type: none"> • Strong Presence in the market across various states of India; • Sound branding under the brand name Superpack; • Over 29 years of industry expertise, building from the ground up; • Good customer relations through regular follow ups and delivery of quality service. 	<ul style="list-style-type: none"> • Limited Market Penetration: the Company has yet to capture significant market share in the southern parts of India and North-Eastern states due to inadequate reach and transportation infrastructure, hampering potential growth opportunities in these regions. • Dependence on Suppliers: the Company operations may be heavily reliant on a few key suppliers for raw materials or components. Any disruption in the supply chain, such as supplier issues or price fluctuations, could negatively impact production schedules, quality, and ultimately, customer satisfaction. • Reliability on manual Labour: at present existing facility lacks automation and rely heavily on manual process.
OPPORTUNITIES	THREATS
<ul style="list-style-type: none"> • Global Expansion: There is a promising opportunity for Super-Pack to expand its sales in foreign markets such as Dubai, Yemen, Netherlands, etc. This expansion could diversify revenue streams and reduce dependence on the domestic market. • Diversification of Product Offerings: Super-Pack could explore diversifying its product range to cater to emerging market trends and consumer preferences, thereby tapping into new customer segments. 	<ul style="list-style-type: none"> • Intense Competition: The market faces stiff competition with little product differentiation, leading to aggressive pricing strategies and a wide range of choices for customers. Super-Pack must differentiate itself through innovation or other means to withstand competitive pressures. • Economic and Political Instability: Economic downturns, trade regulations, and political instability in target markets can pose significant threats to international expansion plans, requiring careful risk assessment and mitigation strategies.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from Six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be Six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 09, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to 3 (Three) Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.
